

attention FDA: Keep Irradiation Labeling!

Re: Docket # 98N 1038,
"Irradiation in the
Production, Processing,
and Handling of Food"

It is important to our society that we are free to make informed decisions. We are not giving informed consent when labels mislead us. The reason

that manufacturers do not want to use the (#1) symbol or word "irradiated" is that many Americans do not want to eat foods that are a possible health RISK.

demand the FDA keep irradiation labeling prominent by requiring product packaging and produce signage to use the radura symbol and the term "irradiated." I feel alternative terms such as "cold pasteurization" are misleading and should never be used.
